Phonak Audéo Sphere™ Infinio

Unprecedented speech clarity in a world of noise

For over 75 years, Phonak has focused on what matters to you: improving speech understanding. With 24 of those years pioneering artificial intelligence (AI) innovation, we push the limits of technology with our Swiss-engineered hearing solutions. Our aim is to empower you to connect socially, thrive mentally and emotionally, and ultimately, enhance your well-being.

Meet Audéo Sphere Infinio, the latest groundbreaking hearing technology from Phonak. It delivers unparalleled de-noising, connectivity and durability for those with mild to profound hearing loss. Going above and beyond any existing hearing aid technology, it is powered by not one, but two chips: Phonak ERA™, a proprietary ultra-responsive chip, and DEEPSONIC™, the world's first dedicated AI chip for sound processing inside a hearing aid. Thanks to DEEPSONIC, the new feature Spheric Speech Clarity delivers clear speech from any direction 1, so you can focus on what's important.

Dream big – your hearing aids can handle it.

1 Raufer, S., Kohlhauer, P., Jehle, F., Kühnel, V., Preuss, M., Hobi, S. (2024). Spheric Speech Clarity proven to outperform three key competitors for clear speech in noise. Phonak Field Study News retrieved from www.phonak.com/evidence.

Embrace the conversation with speech clarity

Every word matters. Every word matters. Spheric Speech Clarity doubles your chances of hearing and understanding each one.[3] You can also navigate even louder environments without an increase in listening effort. Experience clearer speech far beyond any existing technology, making conversations a dream, even at the liveliest of family dinners.

- Separates unwanted noise to deliver clear speech from all directions
- Unparalleled de-noising in complex group conversations [1]

> 10/10 surveyed hearing care professionals report Phonak Audéo Sphere delivered an outstanding hearing experience[2]

From the first moment

Audéo Sphere Infinio delivers exceptional sound quality from the very first moment you put them on. Feel empowered from day one and engage in life's conversations with ease.

Enjoy the convenience of a fully automated hearing aid that adapts to your sound environment

With Audéo Sphere Infinio, Phonak SmartSpeech™ Technology orchestrates features that can double the chance of understanding speech from any direction[3]* and reduce listening effort by up to 45%[4]**

3 Wright, A., et al "Spheric Speech Clarity applies DNN signal processing to significantly improve speech understanding from any direction and reduce the listening effort." Phonak Field Study News in preparation expected August 2024

4 Appleton-Huber, J et al "Speech Enhancer reduces listening effort of speech from adjacent room." Phonak Field Study News in preparation expected July 2024

* Compared to without, for moderate to moderately-severe hearing losses

** In quiet listening situation for adult hearing impaired subjects with moderate to severe hearing loss

Total focus, easier listening

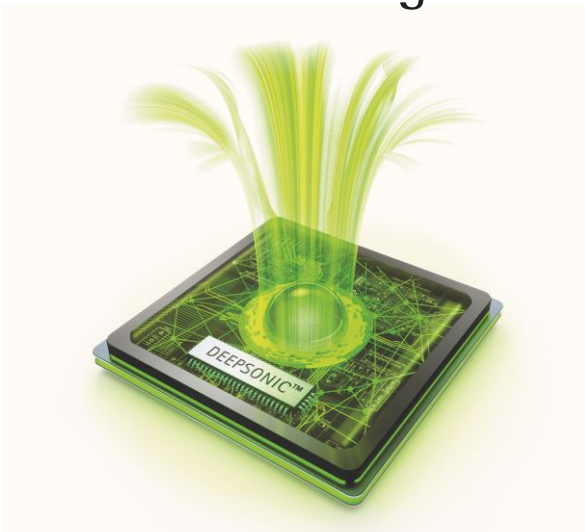

Listen effortlessly 3, even in noisy environments. Imagine being able to participate in conversation in a bustling restaurant, and not worrying about missing a word. Think about being able to concentrate fully on the conversation's content, not just the words spoken. Enjoy the freedom that comes from being able to communicate effectively in any situation — that's the power of easy listening.

Spheric

New Spheric Speech Clarity separates speech from noise. And clearer speech allows you to focus on what's relevant.

Game-changing technology for effortless hearing

Experience the revolution in hearing aid technology with the groundbreaking Phonak DEEPSONIC chip. This world's first AI and deep neural network (DNN) sound processing chip has been designed to solve the key need of people with a hearing loss-speech understanding in noise. Redefine your hearing experience thanks to:

- 53X more processing power compared to current industry chip technology*
- Trained with 22 million sound samples for nuanced sound recognition

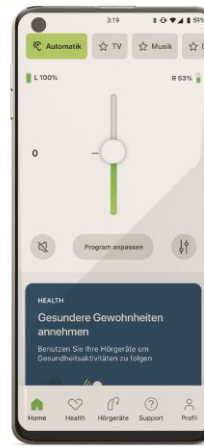

Unlocking unprecedented speech clarity in a world of noise.

* At time of launch

Seamless connectivity

Step into a world of seamless connection with Audéo Sphere Infinio. Your hearing aids connect directly to more Bluetooth® enabled devices than any other hearing aids in the world, and it streams to more than just iOS® and Android™. With the introduction of our new, powerful, ultra-responsive Phonak ERA chip, we've taken connectivity to the next level. Enjoy uninterrupted, hands-free calls and streaming across twice the distance. Feel empowered and stay connected, no matter where you are.

- Pair up to 8 Bluetooth® devices and have 2 simultaneously connected
- Smooth instant switching between listening with the hearing aid and streaming
- Includes RogerDirect™ for a seamless connection to Roger™ microphones without additional hardware
- Adjust settings, control volume and more, all from your smartphone with myPhonak

Unlock more meaningful connections with Roger™

Imagine being able to hear someone speaking from up to 25 meters/80 feet away, overcoming distance and noise. How? Functioning like a third ear, Roger picks up the voice of the speaker, television or telephone and wirelessly transmits it into your Infinio hearing aids, giving you an extra boost when you need it most.

Roger improves speech understanding [5] and empowers you to communicate effectively in challenging situations, so that you don't miss life's beautiful moments.
